

Department of Biology
Open-funded Position for a Masters Student at East Carolina University

We invite your students to visit our lab website (<http://myweb.ecu.edu/ahmada/>) and check out the type of work we do and its contribution to the challenging aspects of medicine, basic science and especially human diseases. We will be happy to provide details about individual projects to the interested students.

This is an excellent opportunity where the student will be provided a monthly stipend in addition to getting a masters degree within 2 years.

Please feel free to contact me for any more information!

Thanks and kind regard,

Atta Ahmad
Asst Prof. (Teach.)
